What is MyPHRSC?

Question

What is MyPHRSC?

Answer

MyPHRSC stands for My Personal Health Record South Carolina. It is a CMS pilot that involves the use of an on-line Personal Health Record (PHR), which will allow people with Medicare the ability to access or collect information about their health or health care services, such as medical conditions, hospitalizations, doctor visits and medications. MyPHRSC will be offered to beneficiaries with original (fee-for-service) Medicare in the State of South Carolina. Medicare beneficiaries there will be given an opportunity to use a PHR populated with their own Medicare claims data. CMS will ensure that strict privacy and security safeguards are in place to protect all beneficiary data and participation in the pilot will be totally voluntary. If you are a resident of South Carolina, you can sign up now. To find out more information about the pilot visit www.MyPHRSC.com.
